Projects

IPL FORTUNETELLER APP

2023-Present

- This project predicts the win percentage of the team on current situation.
- In the **Jupyter Notebook**, **data analysis**, preprocessing, and model development using **Machine Learning** take place.
- **Streamlit** is used to create an interactive web application. The app.py file serves as the front-end of the project, providing a user-friendly interface for users

PORTFOLIO WEBSITE

2023-Present

- My Portfolio website is a reflection of my design aesthetics and attention to detail. With a clean layout, I have focused on creating a user-friendly interface that allows visitors to explore my project effortlessly.
- Created this portfolio website with help of **HTML**, **CSS** and **JavaScript**. Further for making it responsive I've used **Media Query**.

BUDGET WATCHER

2023-Present

- Built this webapp with **HTML**, **CSS**, and **JavaScript**, offers an intuitive and responsive platform for users to effortlessly **monitor** their income, expenses, and the remaining balance.
- Stay up-to-date with your financial status as Budget-Watcher provides real-time updates on income and expenses. Instantly see how your financial decisions impact your overall balance, enabling informed and proactive budgeting.
