Projects

PORTFOLIO WEBSITE

2023-Present

- My Portfolio website is a reflection of my design aesthetics and attention to detail. With a clean layout, I have focused on creating a user-friendly interface that allows visitors to explore my project effortlessly.
- Created this portfolio website with help of HTML, CSS and JavaScript. Further for making it responsive I've used Media Query.

IPL WIN PROBABILITY PREDICTOR

2023-Present

- This project predicts the win percentage of the team.
- In the Jupyter Notebook, data analysis, preprocessing, and model development take place.
- Streamlit is used to create an interactive web application. The app.py file serves as the front-end of the project, providing a user-friendly interface for users

FIGMA & CANVA DESIGN

2022-2023

- Developed figma design that aimed to make something visually appealing and easy to use.
- In Figma : I have developed a web page for shopping Nike Shoes. The layout is simple, with menu at the top that let user easily explore different categories.
- In Canva : Edited my First Youtube Video and also created thumbnail for it.
